

✓ 4 Wrapper

The V4 WRAPPER can wrap thousands of papers per night using the cost saving 8 um jetstream™ G8 plastic and switch from 400 page papers to 40 page by the turn of a dial. This precisely engineered machine is the highest quality rolling machine, faster, safer, quieter & more reliable than any conventional machines.

Everytime you roll with

JetStream™

Our patented JetStream™ technology is the latest in our development to help you save. It enables thinner & less costly 8um film to glide through the film mouth with minimum effort.

V4 Wrapper

FEATURE & ADVANTAGE

AIR EJECTION

Air ejection system with dial-up pressure control selects speed of newspaper ejection

COMBINED MOTOR & GEARBOX

The motor and gearbox have been integrated, eliminating belts, pulleys etc

The motor only spins when the paper is rolling, delivering greater power efficiency

COMPUTER CONTROLLED PROGRAMMABLE MOTOR / GEARBOX

The advanced electronic controls eliminate the need for a hot wire fuse

JETSTREAM™ TECHNOLOGY

Enable efficient use of less costly 8um film

FLEXIBILITY

Wider forks, precise speed control & greater power for larger papers

INCH MODE

Inch mode to start/stop through cycle (Great for plastic feed and hot wire adjustments)

Allows the user to analyse problems at slow speed. Ideal for plastic feed and hot wire adjustment

FORWARD & REVERSE

No more forcing the rolling bed down on a jammed paper

Reverse can be utilised to "unwrap" a jammed paper in seconds

MINIMAL MAINTENANCE

Built to last by all steel construction

All ejection high maintenance parts have been eliminated through the introduction of the air ram

SAFETY

Manufactured to correct operator height (Ergonomically sound)

Automatic front safety flap to keep fingers protected from the forks

Machinery noise is significantly reduced through air operated ejection

Air assisted safety guard to guide papers into forks shield hands while rolling

A 8mm polycarbonate roller guard is designed to provide operator with total protection

ROLLER BED

Air cushioned roller bed for infinite roller bed height for various paper sizes

VARIABLE SPEED

Infinitely adjustable speed control gives the user precise control over the rolling speed

WARRANTY

See sales terms and conditions

Serviced by trained technicians established in all states

OTHER FEATURE

Digital counter

Full supported film holder

Non-static coated feed rollers

Service & maintenance manual

Emergency stop switch and safety cover
